

FCC, This is totally outrageous. First of all, our society since our founding fathers has been built on competition. I PAY for XM radio to provide me with quality and service that I cannot find anywhere else on the radio. If regular radio and NAB dislike XM for providing a better product, than maybe its time for them to start responding to the wants of the consumers. Secondly, let me remind you of a small portion of our constitution that specifically describes the powers of the federal government. Article 1, section 8 clearly defines what the federal government's powers are and in recent history this part of the constitution has been ignored. Nowhere in the description of power does it state that tax dollars are to be used to fund such an organization as the FCC or the regulations that it enforces. This is a total and blatant violation of our constitution and our rights. I strongly urge you to practice what our founding fathers intended you to practice; life, LIBERTY, and the pursuit of happiness. Reject petition 04-160.
